## Remove any temporary files

Once in Safe Mode, run Disk Cleanup to get rid of all your computer's temporary files. Reducing the quantity of files on your device will help speed up the virus scan that you're about to perform in the next step.

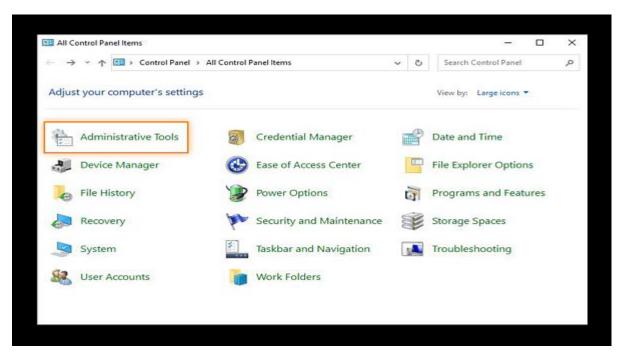

Step 1: Open the Start menu and select Control Panel from the Windows System drop-down menu.

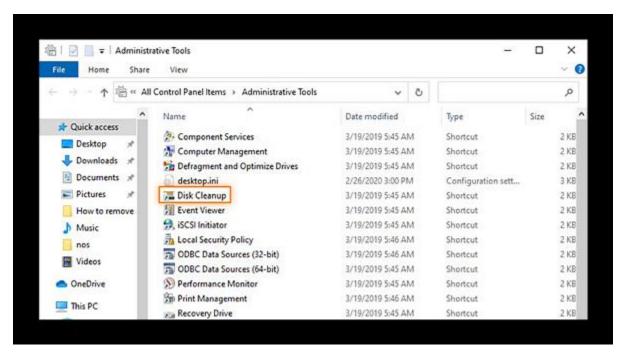

## Step 2: Select Administrative Tools.

## مرحلہ نمبر2: ٹولز میں اپنے کام کے متعلق ٹول کوسلیکٹ کریں۔

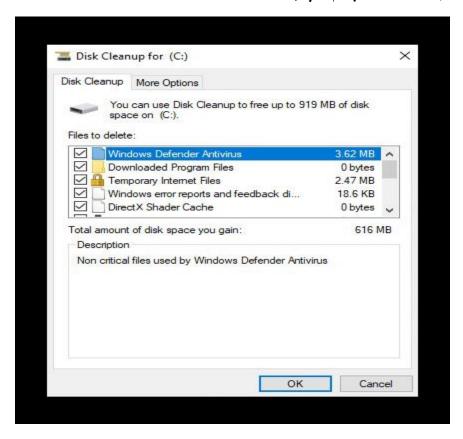

Step 3: Open Disk Cleanup from the list of tools.

## مر حله نمبر 3: ٹولز کی دی گئی لسٹ میں ڈسک کلین اپ کو کھولیں۔

Step 4: Tick the boxes next to the file types you'd like to remove.

Step 5: After making your selections, click OK. Then click Delete Files to confirm.
